Professional Summary

Frontend Engineer with 2+ years of experience building enterprise applications, CRM systems, internal business tools, corporate websites, and GIS-based solutions using Next.js, TypeScript, Laravel, and PostgreSQL. Experienced in scalable frontend architecture, REST API integration, role-based access control, approval workflows, dashboard analytics, and modern Next.js patterns including Server Actions and SSR. Comfortable collaborating with cross-functional and remote teams.

Technical Skills

- Frontend: Next.js, React.js, TypeScript, JavaScript, Tailwind CSS
- Backend: Laravel, REST API, Server Actions, API Routes
- Database: PostgreSQL, Neon
- Authentication & Security: Better Auth, RBAC
- Tools: Git, Excel Export, ArcGIS
- Concepts: SSR, Responsive Design, Performance Optimization

Professional Experience

PT Lintas Cakra Cipta — Frontend Developer (Oct 2025 – Present)

- Developed and maintained 3 corporate websites with integrated blog systems using Next.js and TypeScript.
- Built customer-facing booking workflows and administrative dashboards for reservation and villa add-on management.
- Developed an internal Salesforce platform supporting KPI tracking, sales pipelines, quotations, offerings, customer management, transactions, and monthly revenue reporting.
- Implemented role-based access control using Better Auth for Sales, Supervisors, Managers, and Administrators.
- Built multi-level approval workflows for quotations and offerings involving Sales, Supervisors, and Managers.

- Developed dashboard analytics including revenue reporting, sales performance tracking, leaderboards, target-versus-actual visualizations, and prospect monitoring.
- Implemented field activity tracking with geolocation verification, image uploads, receipt uploads, and Excel export capabilities.
- Designed reusable UI systems including layouts, cards, buttons, typography systems, and utility modules.
- Implemented Server Actions, REST API integrations, SSR, and performance optimizations using modern Next.js architecture.

PT Dwi Purwa Teknologi — Full-Stack Developer (Mar 2024 – Sep 2025)

- Developed enterprise web applications using Laravel and PostgreSQL for government and internal projects.
- Contributed to a GIS-based military application using ArcGIS libraries for geospatial visualization and operational mapping.
- Built modules for command center dashboards displaying weather information, business data, and organizational insights.
- Developed a digital archiving system for military psychological assessment records, certifications, achievements, and personnel history data dating back to the 1980s.
- Participated in database schema design, documentation, and implementation of business requirements.

Technical Content Creator — @cewekcoding (Jan 2026 – Present)

- Grew a programming-focused platform to 2,800+ followers through educational software development content.
- Simplified technical concepts into engaging short-form educational content.

BLACKBOX AI — Content Creator (May 2026)

- Created educational content focused on AI tools and developer productivity during a collaboration trial period.

Universitas Pasundan — Laboratory Assistant & Coordinator (Jan 2021 – May 2023)

- Mentored 30–40 undergraduate students across programming, database, object-oriented programming, and game development courses.
- Served as coordinator of Game Programming laboratory assistants and examiner for practical examinations using Unity-based projects.

Selected Projects

- Internal Salesforce Platform: Built CRM and sales management tools with RBAC, approval workflows, dashboard analytics, geolocation verification, image uploads, and Excel export capabilities.
- Casanela Villa Booking Engine: Developed booking workflows and administrative dashboards for reservation and villa add-on management.

- Corporate Website Platform: Developed SEO-friendly company profile websites with integrated blog systems using SSR and modern Next.js architecture.
- GIS Military Application: Contributed to military operational mapping and visualization features using ArcGIS and PostgreSQL.

Education

Telkom University — Master of Computer Science (2026 – Present)

Universitas Pasundan — Bachelor of Engineering in Informatics (2019 – 2023)
